

Fourth Joint International Annual Research Conference (JIARC-2025)

Thursday 4 December 2025 - Friday 5 December 2025

Bahir Dar, Ethiopia

Scientific Programme

Translating Research into Action: Strengthening Public Health Systems in Crisis-Affected Settings

Community Engagement and Local Ownership in Crisis Response

Communities co-designing health responses, strengthening local capacity, community-led solutions and coordination with local leadership.

Implementation Research and Scaling Lessons

Studies assessed real-world effectiveness, identified barriers and enablers, adapted to context, monitored fidelity and quality, engaged stakeholders, translated knowledge into policy, ensure sustainability and scalability, and document lessons learned.

Innovation and technology during multiple crisis

Resilience-building strategies, digital health tools, telemedicine, advanced disease surveillance, outbreak response, and adapting technologies for low-resource and insecure environments

Health System Strengthening and Service Access in Crisis Settings

Service delivery, system rebuilding, workforce retention, and neglected areas

Mental Health and Psychosocial Support in Emergencies

Resilient society, studies on trauma, stress, and long-term psychological impacts in the emergency context
